SATHVIK VK

Founder/operator → DeepTech venture investing

Bengaluru · sathvik@perfstaq.com · LinkedIn: linkedin.com/in/sathvik-vk-b76090269 · Selected work: sathvikvk.pro

PROFILE

Founder/operator transitioning into institutional venture investing. Strongest at rapid domain learning, technology-commercial analysis, founder evaluation, research synthesis, financial modelling and execution. I have not managed institutional capital; this application is supported by original, public-source investment work that can be inspected and defended.

SELECTED INVESTMENT WORK

INDEPENDENT DEEPTECH INVESTMENT PORTFOLIO | 2026

- Mapped 48 companies across AI infrastructure, semiconductors, robotics, space and defence; clearly labelled research coverage, not proprietary deal flow.
- Built a thesis around intelligence at the physical interface, testing where technical difficulty becomes commercial leverage and what a fund can own.
- Completed three original screens with explicit PASS / WATCH / PROCEED outcomes for Simplismart, C2i Semiconductors and CynLr.
- Authored a full CynLr Series B IC case with operating model, valuation, dilution, milestone-based structure, downside case and fund-return math.
- Built a 1,583-formula live workbook across bear/base/bull operations, expected value, valuation, sensitivities and fund math; logged 54 sources with evidence labels and conflicts.
- Used a decision review to document what changed my mind, where founder/operator bias may distort judgment, and what evidence would reverse the recommendation.

FOUNDER / OPERATOR EXPERIENCE

FOUNDER — PERFSTAQ | Bengaluru

- Built and iterated AI-native product and workflow systems across product strategy, rapid prototyping, user/customer discovery and commercial experimentation.
- Worked directly across product, AI tooling, GTM, sales and partnerships under startup constraints.
- Founder experience informs diligence on product velocity, customer evidence, execution risk and the gap between a compelling demo and a durable business.

Application note: add verified start date, shipped product facts and any metrics you are comfortable stating before submission; no unsupported metrics are included here.

PRIOR EXPERIENCE

COMMERCIAL / TECHNICAL ROLES

Experience spanning technical sales, customer conversations, product problem-solving and commercial execution. Detailed dates and titles should be copied from the verified employment record before submission.

INVESTMENT TOOLKIT

Investment: sourcing · screening · technology-commercial diligence · market mapping · valuation · cap tables · scenario analysis · IC memo writing · decision review

Technology: AI infrastructure · applied AI · product architecture · industrial automation · semiconductor and robotics research

Commercial: founder/customer interviews · GTM analysis · pricing · negotiation · execution under constraints

Tools: Excel / Google Sheets · public-source research · structured evidence logs · AI-assisted research workflows

BOUNDARY

Independent work product prepared from public sources without management access. Illustrative analysis, not investment advice. No institutional VC experience or closed investment track record is claimed.
